

# 3D Animation Course

## Objectives :

This 3D Animation Year long course (validated by VEDA) is cutting edge course in every respect; theory and technology, and cutting edge analysis of 3D application and its uses. It endows you with technological expertise to create highly sophisticated animations and the comprehensive understanding of market and industry contexts to make those animations compelling and effective.

## Course Highlights :

**Name:** 1 Year Course in 3D Animation

**Duration:** 1 Year

**Semester:** Two, 6 months each

**Offered under:** Autonomous mode

**Eligibility:** S.S.C. (10th) and above

**Placement assistance:** Yes

## Scholarships :

Fine arts students or students with excellent sketching skills can avail scholarships up to 30% in the course. Students can speak to course advisor in the college for more information.

## Careers :

3D animation training with our expert mentors makes you sound enough in the field of 3D animation. Students after completing their course in 3D animation apply for various animation studios for the following positions :

- Concept Artist
- 3D Modeler
- Lighting Artist
- Texturing artist / UV artist
- Rigger
- Animator
- Composer
- Visual effect Artist

## Course Structure\* for 3D Animation Course

### Semester 1

- Introduction to computers & Internet (Th)
- Anatomy Basics
- Classical Animation Basics
- Clay Modeling
- Foundation Art (Th+Pr)
- Drawing for Animation and Conceptual Art
- Character Design and Storyboard

### Semester 2

- Adobe Premier
- Organic and Inorganic Modeling with Maya
- Texturing & Lighting
- Photoshop for 3D & Autodesk Maya UI & Tool
- Rigging
- Character Animation
